

First Floor Meeting Room

Development of the existing gallery area to provide a twin level suite of meeting areas with glass balustrade overlooking the main worship area.

Kitchen and Servery

The kitchen, with a separate servery, will have high quality fittings and commercial grade appliances suitable for special events

Toilets

A discreetly placed sound proofed toilet with facilities for the disabled will serve the whole building

Tower Room

Rearranged tower room providing new WC facilities, and a new stair up to the gallery, flower store and sink

Heating

The raised floor in the nave and south aisles with efficient underfloor heating will create a warm and level space.

Flooring

A level floor will improve the access and flexibility of the church. Finishes are to be confirmed. Possibility incorporating the Victorian tiles to provide familiar references through the building.

New furniture and Storage

Good quality wooden stackable chairs will increase flexibility and release the potential of the building.
